For data vendor disclaimers refer to www.ndr.com/vendorinfo/. The information presented is intended to illustrate the performance of International Small Cap stocks according to their dividend policy. Returns shown include dividends reinvested. This is not the performance of any strategy overseen by Copeland and there is no guarantee that investors will experience the type of performance reflected in the information presented. Strategies managed by Copeland's investment team are subject to transaction costs, management fees, trading fees or other expenses not represented in the information presented. There is no guarantee that companies will declare dividends or, if declared, that they will remain at current levels or increase over time. Dividend Growers included stocks that raised their existing dividend or initiated a new dividend during the previous 12 months. Flat Dividend Payers included stocks that pay a dividend but have not raised or lowered their existing dividend during the previous 12 months. Non Dividend Payers included stocks that have not paid a dividend during the previous 12 months. Dividend Cutters included stocks that lowered their existing dividend or eliminated their dividend during the previous 12 months. You cannot invest directly in an Index. For information on the Index shown above as well as other important information, please refer to the Disclosure section.

Copeland International Diversified Small Cap Dividend Growth

Benchmark: MSCI World ex US Small Cap® Index

Inception: December 31, 2016

Description: International companies with market capitalizations below \$5.5 billion that have consistently increased their dividends.

Stock Universe

International companies with market capitalizations below \$5.5 billion that have consistently increased their dividends

Stock Selection

Top ranked stocks based on our multi-factor fundamental model

Sector Selection

We are benchmark aware, however sector and regional weightings are largely a byproduct of underlying security selection

Portfolio

Approximately 70 holdings made up of companies that have consistently increased their dividends

Dividend Growth defines our universe, drives our total return solution and is the centerpiece for our research process.

Dividend Growth stocks are ranked using a proprietary fundamental ranking system. This model evaluates multiple factors in an effort to establish each company's ability to grow its dividends in the future.

Factors we have found to be predictive of strong dividend growth and total returns include:

- **Dividend Coverage**
- **Free Cash Flow Generation**
- **Growth in the Underlying Business**
- **Return on Capital**

Top-ranked stocks within the model are subject to deep fundamental analysis.

Stock Selection Process

Stocks are sold for the following reasons:

- **Dividend Cut:** Any holding that cuts or fails to raise its dividend is sold.
- **Dividend Quality:** Portfolio candidates must meet minimum thresholds of cash flows and earnings supporting the dividend. Violation of these thresholds has been found to be predictive of a future dividend cut.
- **Quantitative Ranking Deteriorates:** Problems are often exhibited in the quantitative rankings when factors such as earnings momentum, cash flow or return on capital deteriorate. These are red flags for detailed analyst review.
- **Fundamental Concerns:** Analysts are continuously questioning the competitive advantage of the company, as well as macro, regulatory or secular themes, with a focus on identifying risks to the dividend.

There is no guarantee that companies will declare dividends or, if declared, that they will remain at current levels or increase over time.

The data quoted in the charts above represents past performance and does not indicate future returns. Returns for periods of greater than one year are annualized. Gross returns include transaction costs, but do not reflect the deduction of investment advisory fees. A client's return will be reduced by the advisory fees and any other expenses it may incur in the management of its investment advisory account. Copeland's management fees are described herein and in Copeland's ADV Part 2A. After-tax results will vary from the returns presented here for those accounts subject to taxation. Performance results of the composite are based on U.S. dollar returns. Please refer to the Disclosure sections for additional information and Net Performance. **Alpha** is a measure of the difference between actual returns and expected performance, given the level of risk as measured by beta, where beta measures sensitivity to index movements. **Beta** is a measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole. **Standard deviation** is a measure of the variability of returns - the higher the standard deviation, the greater the range of performance (i.e., volatility). **Upside Capture ratio** measures the manager's overall performance to the benchmark's overall performance, considering only quarters that are positive in the benchmark. An Up Capture ratio of more than 1.0 indicates a manager who outperforms the relative benchmark in the benchmark's positive quarters. **Downside Capture ratio** is the ratio of the manager's overall performance to the benchmark's overall performance, considering only quarters that are negative in the benchmark. A Down Capture ratio of less than 1.0 indicates a manager that outperformed the benchmark in the benchmark's negative quarters. **Tracking Error** is a measure of how closely a portfolio follows the index to which it is benchmarked. **Due to methodology differences in calculating performance, Morningstar performance numbers may vary slightly from other providers.** © 2019 Morningstar, Inc. This presentation allows you to compare the performance history of Copeland's strategies with its benchmark. Total return is calculated assuming reinvestment of all dividends. For performance numbers current to the most recent month-end, please contact us at 484-351-3700.

Copeland Capital Management, LLC (CCM), a 100% employee-owned registered investment adviser, provides innovative dividend growth solutions to its clients. CCM claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. CCM has been independently verified for the periods January 1, 2006 through March 31, 2018 by Kreisler Miller. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation. The verification and performance examination reports are available upon request. The Composite has not been examined for specific verification. CCM created this composite on January 1, 2017.

The International Diversified Small Cap Dividend Growth Composite represents all discretionary managed accounts managed by CCM in the International Diversified Small Cap Dividend Growth style. CCM uses a proprietary, quantitative model to screen internationally traded equities to identify those demonstrating the strongest cash flow and dividend growth for inclusion in a portfolio of approximately 50 to 75 stocks. Beginning in 2017, the Composite contains two accounts which are non-fee paying. The accounts comprised 100.0% of the composite since inception (January 1, 2017.) The computations of gross and net returns both assume the reinvestment of all dividends, interest, and capital gains. Gross returns include transaction costs but do not include CCM's management fees and custodial fees. Net returns reflect the deduction of CCM's model fee of 1.40%, the highest fee charged for a Composite account and transaction costs from gross returns. Accounts are added to the composite in their first full calendar month after being invested in this style with CCM. Terminated accounts are removed from this composite after the final full month under CCM's management. A complete list and description of CCM's composites is available upon request. Additional information regarding CCM's policies and procedures for valuing portfolios calculating performance, and preparing compliant presentations, are available upon request.

Any holdings listed are for informational purposes only and should not be deemed a recommendation to buy the specific securities mentioned. Holdings are subject to change, may not be representative of current holdings, and are subject to risk. Past performance is not indicative of future performance. Performance results of the Composite are based on U.S. dollar returns.

Annual or Most Recent Quarter	# of Portfolios	Internal Dispersion***	Three Year Ex-Post Standard Deviation** ----- Composite	Three Year Ex-Post Standard Deviation** ----- Index	Market Value (in millions)	% of Total Firm Assets	Annual Performance		
							Gross-of-Fees	Net-of-Fees	MSCI World ex-US Small Cap Net Index*
1Q19	2	N/A	N/A	N/A	\$0.6	<1%	13.1%	12.7%	10.9%
2018	2	N/A	N/A	N/A	0.5	<1	-9.9	-11.1	-18.1
2017	2	N/A	N/A	N/A	0.6	<1	33.8	32.0	31.0

Footnotes:

* The MSCI World Ex-US Small Cap Index captures small cap representation across 22 of 23 Developed Markets (DM) countries (excluding the United States). With 2,437 constituents, the Index covers approximately 14% of the free float-adjusted market capitalization in each country. The index designed to provide a broad measure of stock performance net of foreign dividend withholdings throughout the developed world, excluding U.S. stocks. The Portfolio's strategy differs from the composition of the Index, which is unmanaged and the returns do not reflect any fees, expenses or sales charges. You cannot invest directly in an Index.

** The Three-Year annualized standard deviation measures the variability of the Composite and the benchmark returns over the preceding 36-month period. Ex-post calculations are not presented for periods less than 36 months.

***Internal Dispersion is calculated using the asset-weighted standard deviation of gross-of-fees returns of all portfolios that were included in the composite for the entire year. With fewer than five accounts in the composite, a measure of dispersion is not applicable.

CCM's standard advisory fee schedule for International Small Cap Dividend Growth Strategy is as follows: 1.40% on the first \$5 million of assets, 1.35% on the next \$5 million of assets and 1.20% above \$10 million of assets. This standard fee schedule is subject to change at the firm's discretion.

Additional Disclosures:

GIPS Compliance Standards: Ethical standards to be used by investment managers for creating performance presentations that ensure fair representation and full disclosure of investment performance results. Global Investment Professional Standards were created by the Chartered Financial Analyst Institute and governed by the GIPS Executive Committee. They are standardized guidelines for reporting the ability of an investment firm to make profits for investors. Verification reports can be obtained by calling 484-351-3700 and requesting a copy. Copeland Capital Management claims compliance with the Global Investment Performance Standards (GIPS®). To receive a list of composite descriptions of Copeland Capital Management and/or a presentation that complies with the GIPS standards, contact us at 484-351-3700 to request a copy.

Foreign Investing Risk: Investments in foreign countries are subject to country-specific risks such as political, diplomatic, regional conflicts, terrorism, war, social and economic instability and policies that have the effect of decreasing the value of foreign securities. Foreign investments may experience greater volatility than U.S. investments. **Market Risk:** Overall securities market risks may affect the value of individual securities in which the Copeland strategies invest. Factors such as foreign and domestic economic growth and market conditions, interest rate levels, and political events affect the securities markets. **Dividend Cuts Risk:** The risk that companies may cut or eliminate their dividends or pay dividends in stock rather than cash causing investors to sell the stocks and the price to fall. **Forward-looking Statements:** Some of the information in this document may contain projections or other forward-looking statements regarding future events or future financial performance of countries, markets or companies. These statements are only predictions and actual events or results may differ materially. The reader must make his/her own assessment of the relevance, accuracy and adequacy of the information contained in this document, and make such independent investigations as he/she may consider necessary or appropriate for the purpose of such assessment.
